

ABOUT ME

Programming is my passion. I love writing code and when i am not, i truly miss it. I started by myself watching lessons on the internet mainly at lynda.com and later on at linkedin learning. I have learned a lot in the past years in both work and personal experience. I always try to be up to date with new technologies that come up every day. I found myself enjoying better being a backend developer using various languages but frontend is something that does not go without notice. I am a teamwork player, cooperative and i always take responsibilities without any hesitation. I am keen on writing clean and readable code as much as possible. If i am not coding, i like to work out in the gym or watch movies.
